Culligan®

better water. pure and simple.®

Culligan® water is better. Pure and simple.

When your problem is iron, hydrogen sulfide or both, Culligan's Iron-Cleer® filtration system is the solution.

DISCOVER ALL THE BENEFITS OF A CLEANER, EASIER WAY OF LIVING WITH CULLIGAN'S IRON-CLEER® WHOLE HOUSE WATER FILTERS.

Tough on Iron Water.

If there's iron in your water, you don't need us to tell you how bad a problem it is. Ugly rust stains on your clothes, fixtures, and dishes remind you everyday.

Culligan's Iron-Cleer® Filter takes care of all that. Through an exclusive patented process, iron is oxidized and then filtered, leaving you with fresh, clean water for bathing, cleaning and washing.

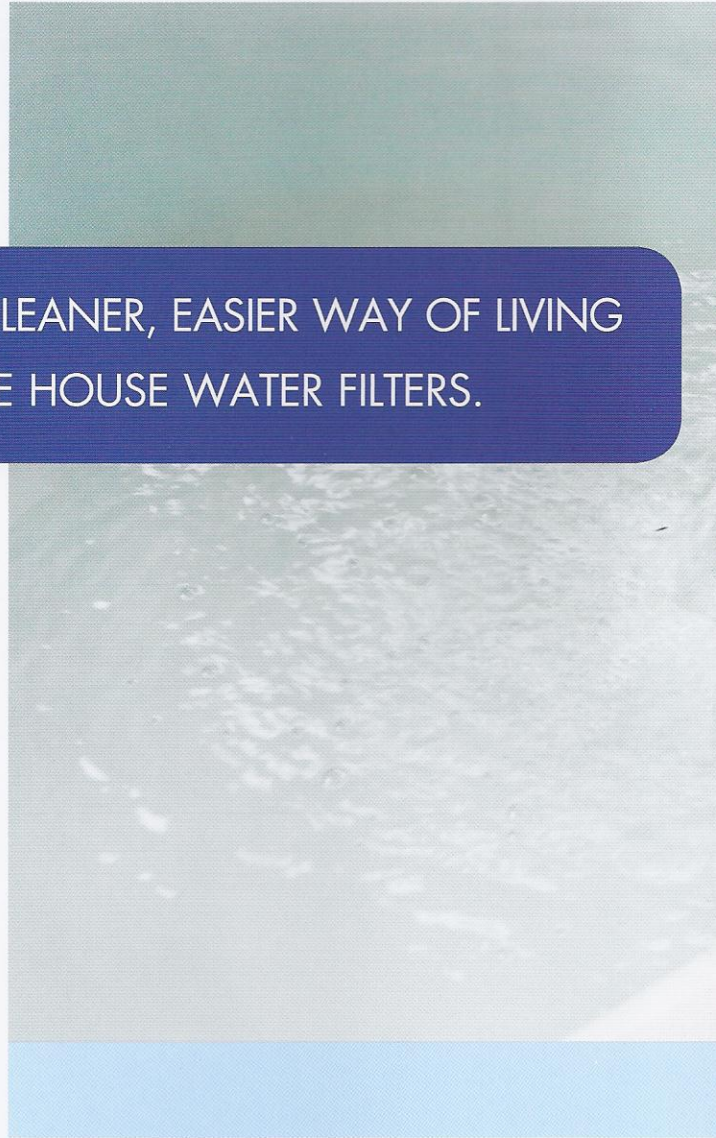

And since the Iron-Cleer® utilizes this unique air compression process, there is no need for regenerants. Simple backwashing saves you money on chemicals and water.

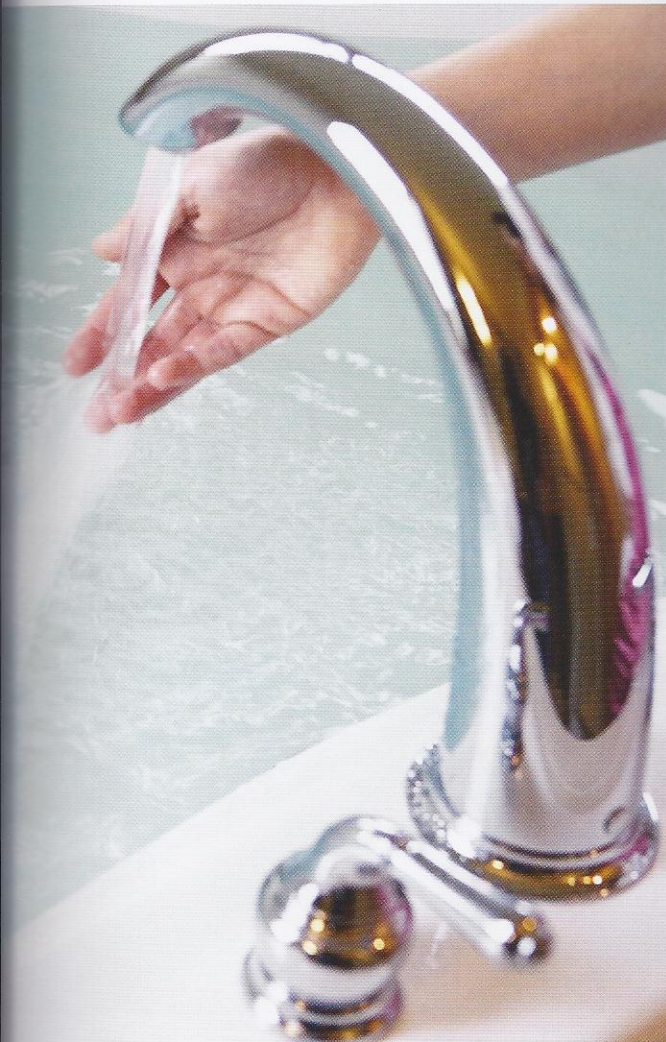

Stops that "Rotten Egg Odor."

Hydrogen sulfide. If you have it, you know it. It's what causes that "rotten egg" odor in your water. And it doesn't look any better than it smells. Hydrogen sulfide leaves black stains on your laundry and bathroom fixtures. Even worse, it can cause serious damage to your pipes, leading to costly plumbing repairs.

Culligan's Iron-Cleer® Filter virtually eliminates these problems using a patented filtration process that removes hydrogen sulfide from your water. So you won't have to hold your nose every time you turn on the tap.

Plus, there is no need for chemical regenerants. So you won't be bothered with the expense and hassle of other chemicals. That will save you time and money.

Controls Staining - no more iron stains on your fixtures

Removes Odors - no more of that "rotten egg" smell

Easier Cleaning - your whole household will be easier to clean

Brighter Wash - your washables will be stain-free and brighter

Great-Tasting Water - you'll notice the improvement immediately

Quality. Convenience. Economy.

What else would you expect from Culligan®?

With Culligan's Iron-Cleer® Filter, you can be sure you're getting one of the most dependable, convenient, advanced filters on the market today.

Unlike conventional water systems, the Iron-Cleer® Filter doesn't use messy, expensive chemicals to regenerate, nor do they require as much water during reconditioning. So you'll save on chemicals and your water bill.

Finally, the Culligan® name means expert Culligan® service.

Our warranty is our word on it.*

The Culligan® Commitment:

At Culligan® we are committed to providing:

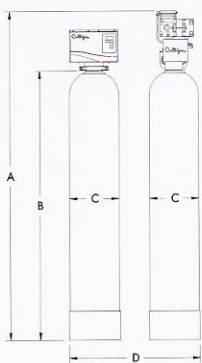

- Highest quality products. Our units are tested to the highest standard and use parts that are corrosion resistant.
- The most experienced, professional service. You can count on Culligan's 70-year tradition of innovation and service in the water treatment industry. A trained technician will install and program your home system. Also available: salt delivery, filter/media changes and financing.

Culligan®

better water. pure and simple.®

Culligan's Exclusive Iron-Cleer® Design Technology

Iron-Cleer® Water Filters are built with state-of-the-art features to deliver the finest conditioned water to your entire family chemical free. Choose from two different available models.

Product Specifications:

Iron-Cleer® System - The air compressor is key to the aeration process which oxidizes the dissolved iron, manganese and hydrogen sulfide. On/off times adjustable to raw water characteristics.

Customized to Fit Your Life - Culligan patented electric timer automatically regulates all cycles - providing customized service for your individual needs. The Gold Series Iron-Cleer includes a meter and enhanced electronics.

Chemical-Free - Requires no chemicals for operation or reconditioning. Oxygen is used to naturally clean your water.

Bypass the System - Cul-Flo-Valv® bypass valve allows you to bypass the filter for other uses, such as watering the lawn.

Worry-Free Water for Everyone - Guest Cycle™ recharge provides an extra supply of filtered water when there are more people than normal in the home.

Reliable Valve - Exclusive, non-corrosive control valve that directs water flow during service and reconditioning. Low friction piston and seal services defy problem water.

Durable Tanks - Sturdy, filament-wound exterior, and smooth, non-permeable inner tank shell is listed with WQA.

Unique Multi-Layer Filter Media - The media in the filter tank acts as an insoluble catalyst to enhance the reaction between the oxygen and iron.

Two-Tank System - Aeration tank converts dissolved iron and manganese into particulate matter which is then filtered out.

Unit	Service Flow (gpm)	Media	Control Valve	A	B	C	D
IC-10 1"	5	1.5	1"	66"	54"	10"	26"
IC-12 1"	7	2.0	1"	64"	52"	12"	30"

CAUTION: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. The contaminants or other substances removed or reduced by this water treatment device are not necessarily in your water.
Manufactured and licensed under PATENT # B15,096,596.
